Dear President Clinton:

Currently the FDA is allowing genetically engineered foods to come to market unlabeled even though polls show that 81% of Americans want them labeled (Jan. 11, 1999 Time magazine poll). I am writing to insist that legislation be passed into law that will require genetically engineered foods to be labeled as such, regardless of whether the food is in its whole form or as an ingredient in processed foods.

I, as well as many others are concerned about the safety of our food and wish to have some control over the quality of food that we consume. Being able to buy truly organic food and avoid genetically engineered food is a right I feel is important to all Americans.

Please pass legislation to label all genetically engineered foods. I would appreciate a response back letting me know if you intend to work to pass this legislation. Thank you.

Sincerely,

Mary Korman
